GUIDE TO SETUP POSTMAN

In order to work with the Experience Platform APIs you will need to work with a 3rd party tool called Postman. Follow the guide at the link below to learn how to download and configure Postman.

<https://developer-stage.adobe.com/dep/guides/postman/getting-started/>

Use the below credentials when working through the guide.

DEVELOPER CONSOLE CREDENTIALS

Below are the environment credentials you will be using when working with the Experience Platform APIs.

Credential Name	Value
CLIENT ID	14118835483d4ba1be2077bceb9d77d7
CLIENT SECRET	p8e-q54C4mUmqNmcv54GgTP3bahm8Mr8Tcaz
TECHNICAL ACCOUNT ID	035801B362D740240A495C0D@techacct.adobe.com
ORGANIZATION ID	37E0399C61687C4E0A495E06@AdobeOrg
PRIVATE KEY	https://zerobin.net/?2aedic7c9b27c445d#KydFwtvzlZimmYVRiOP7mZG6S2ifje7Zs1k5cLF45tc= Password: \$ssn!

LEARNING OBJECTIVES

What should you walk away with after this lab?

1. Understand how to utilize Postman with APIs
2. Be able to setup and configure Postman (i.e. collections and environments)
3. Work with Adobe postman collections
