## GUIDE TO SETUP POSTMAN

In order to work with the Experience Platform APIs you will need to work with a 3<sup>rd</sup> party tool called Postman. Follow the guide at the link below to learn how to download and configure Postman.

<https://www.developer-stage.adobe.com/dep/guides/postman/getting-started/>

Use the below credentials when working through the guide.

## DEVELOPER CONSOLE CREDENTIALS

Below are the environment credentials you will be using when working with the Experience Platform APIs.

Credential Name	Value
CLIENT ID	14118835483d4ba1be2077bceb9d77d7
CLIENT SECRET	p8e-q54C4mUmqNmcv54GgTP3bahm8Mr8Tcaz
TECHNICAL ACCOUNT ID	035801B362D740240A495C0D@techacct.adobe.com
ORGANIZATION ID	37E0399C61687C4E0A495E06@AdobeOrg
PRIVATE KEY	<a href="https://zerobin.net/?cf515d12d7ef0967#Tia/NkgIQ1zZ9wKEM14pZXxePQAJu20vt/dsLaADEsQ=">https://zerobin.net/?cf515d12d7ef0967#Tia/NkgIQ1zZ9wKEM14pZXxePQAJu20vt/dsLaADEsQ=</a>

## LEARNING OBJECTIVES

**What should you walk away with after this lab?**

1. Understand how to utilize Postman with APIs
2. Be able to setup and configure Postman (i.e. collections and environments)
3. Work with Adobe postman collections
